EDUCATION

Stony Brook University | Stony Brook, NY
Bachelor of Science in Computer Science (Honors) | *May 2030*

WORK EXPERIENCE

Software Development Intern (AI Team) – ReWild Long Island | Remote
Aug 2026 – Present

- Architecting a multi-lingual, conversational AI platform on **Google Cloud Platform** using containerized **Gemma LLMs** and **Hugging Face BGE-M3 embeddings** to deliver localized native plant guidance and drive community ecological action via a **JavaScript/HTML/CSS** web interface.
- Scaled backend engine capabilities by constructing **RESTful microservices** in **TypeScript** and **Python** deployed via **Docker**.
- Engineered production-ready **PostgreSQL** schemas with the **pgvector** extension, enabling high-performance vector similarity search to deliver contextual data across partner non-profit networks.

Software Development Intern (Full Stack Web Dev Team) – ReWild Long Island | Remote
Sep 2025 – Aug 2026

- Led a small development team to build a secure volunteer management platform using **Node.js**, **TypeScript**, **JavaScript**, **HTML**, **CSS**, and **Python** with **JWT authentication**, for orchestrating community-driven environmental action.
- Orchestrated frontend deployment to **Vercel** and backend migration from **Cloudflare** to **Google Cloud Platform** connected via **RESTful APIs.**
- Automated backend administrative workflows using **PowerShell**, **Git**, and **PostgreSQL** to streamline scheduling, location tracking, and user profile management.

MIS (Management of Information Systems) Intern – Designatronics | Hicksville, NY
Jun 2025 – Aug 2025

- Executed the full-scale software migration of a legacy enterprise engineering tool using **C#**, **PHP**, **Java**, **JavaScript**, **HTML**, and **CSS** to comply with **Department of Defense (DOD) cybersecurity mandates**.
- Reverse-engineered and redeployed internal infrastructure hosted on outdated servers, utilizing **Microsoft IIS**, **MySQL**, and **PowerShell** across **Windows** and **Linux** network environments.
- Standardized local hardware deployment, resolved network printer configurations, and managed system administration utilities using **Active Directory Tools** and **Linux**.

Future Ready Engineer Intern – RTX Corporation | Remote
Jun 2024 – Jul 2024

- Developed an **AI-driven** prototype application leveraging **Python**, **JavaScript**, **HTML**, and **CSS** designed to detect email phishing threats and protect elderly users. Streamlined feature delivery and **UI layout** to make the **user experience intuitive for senior citizens**.

TECHNICAL SKILLS

- **Languages:** JavaScript, Python, TypeScript, Java, SQL, C#, PHP, HTML/CSS, PowerShell, Bash
- **Frameworks & Tools:** React, Node.js, Hugging Face, Docker, Google Cloud Platform, Vercel, RESTful APIs, JWT Authentication, Microsoft IIS, Git, GitHub, Active Directory Tools, VSCode, Visual Studio
- **Databases & Cloud:** PostgreSQL, Vector Databases(pgvector), MySQL, Cloudflare, Google Cloud CLI

- **Operating Systems:** Linux, Ubuntu, Windows
- **Concepts:** Full-Stack Web Development, RAG, OOP, API Design, System Design, Cybersecurity Compliance

LEADERSHIP & EXTRACURRICULAR ACTIVITIES

- **Co-President** | Academy of Information Technology, Northport High School (NAF Certified)
- **Co-Captain** | Mathletes Team, Northport High School (National Championship Title)
- **Captain** | Varsity Boy's Badminton Team, Northport High School
